

The Rundle Health Centre (Edmonton North PCN) is looking for a **NEW** team member who:

- Holds a **Degree** in Nursing, Psychiatric Nursing, Social Work, Psychology, Occupational Therapy or equivalent
- Possesses strong **biopsychosocial assessment and intervention skills** related to mental and physical health conditions
- Training in mental health crisis and **suicide intervention**
- Interested in **learning and teaching**
- Has the proven ability to be **flexible** and **manage numerous competing priorities** in an unstructured environment **calmly** and **effectively**
- Excels in **fast-paced environments**
- Has a **strong ability to build** and maintain **positive relationships**, particularly in ambiguous or uncertain situations

To fill the role of:

Behavioral Health Consultant (BHC)

Utilizing the Behavioral Health Consulting model of care, the BHC works collaboratively as a member of the primary care team to provide brief 15-30 minute interventions to individual patients across the lifespan. The BHC will work closely with primary care physicians within a multidisciplinary team to assess, plan, implement and evaluate behavioral based treatment plans and group programs to support improved health outcomes.

Requirements of the role:

- A minimum of two years' experience working in primary care and/or a community based setting required, experience with vulnerable populations is preferred

- Registration and in good standing with relevant College as recognized by the Health Professions Act
- Standard first aid and CPR – level C
- A strong belief in approaching health holistically and practicing in culturally responsive manners
- Desire to work to one's full scope of practice within their areas of competency
- Solution focused and a strength based approach to problem solving; training in motivational interviewing and health change methodology are assets
- Ability to think in terms of population health by using approaches like stepped care and group sessions and identification of clinical pathways
- Sound judgement and good business acumen
- Must have own vehicle and valid driver's license

What to expect day to day:

- To work collaboratively in a patient centred, integrated team based primary care practice setting.
- To participate in the care of individual patients, practice populations and associated communities
- To assist in development of brief intervention strategies with clinic patients
- To occasionally deliver group programs with multidisciplinary team members
- To make professional, competent and autonomous decisions with patients as a member of the multidisciplinary team.
- To act as a resource to other multidisciplinary team members, healthcare institutions and community agencies or programs.
- To ensure accurate, objective and timely clinical documentation in the appropriate medical record.
- Coordination of various special projects, as required to meet organizational objectives

Openings: **Multiple**, 38.75 hours weekly

Location:

Rundle Health Centre (3427-118 Ave)

And in communities within the Network
